For the attention of the Reach coordinator,

## Reach Compliancy Statement

The vast majority of the plastic and metal products distributed by Davis Industrial Plastics Ltd and Eurostan (hereafter referred to as the companies), are considered as articles and are consequently not directly affected Reach, meaning they do not have to be registered or pre-registered.

A few substances are supplied by the companies in the form of Solvent cements for jointing various pipe work systems. Our obligations require that MSDS are available for these products and these are held and regularly checked by ourselves. 'Upstream' information has been requested regarding the pre-registration requirements / status of these items.

The companies are part of a chain of 'downstream' users who need to get the relevant product information from the members of our Supply chain. We are ensuring our link in this chain is maintained by contacting our 'upstream' Suppliers for information and confirmation they are doing the same. We will then make this information available to our 'downstream' users as required.

We are doing all that is required to ensure that the products we supply are Reach compliant. Should our analysis identify any adverse consequences for the future supply of our products we will take measures to ensure continued availability or identify alternatives.

If your company has identified any 'unusual' use of a product which may have implications in the registration process please let us know and we can pass the information 'upstream' to the relevant Supplier making the registration.

Our contact details regarding Reach enquiries is

Gavin Davis, [reach@davis-plastics.co.uk](mailto:reach@davis-plastics.co.uk)

The most up to date information on our products current Reach status can be found at

[www.davis-plastics.co.uk/reach](http://www.davis-plastics.co.uk/reach)  
(from 22/12/08)
